

# BLACK HAWK

PRODUCT OVERVIEW

## WE FLY WITH YOU WHILE STAYING OUT OF THE WAY.

Blackhawks may be purchased with Managed Detection and Response services covered by our \$1 Million insurance-backed warranty. That means we operate the appliance for you, monitor your network, and work with you to eradicate and stop cyber threats. We become familiar with your specific needs and collaborate with you on proactive risk reduction and responses to cyber events.

# BLACK HAWK +

## MORE POWER

We understand the power of teamwork. Organizations just like yours are successful because of it. That's why we offer our team's skills to meet your unique needs. We work with you every step of the way without getting in your way. That's our style.

## EXPERT DEFENSE

We'll apply over 15 years of cybersecurity experience solving thousands of state and national incidents to monitor and protect your network. Our Cyber Crime Center-centric Managed Detection and Response approach is now yours.

## GREATER FREEDOM

Our \$1 million dollar warranty and a leading, competitive price point takes the weight off your budget and your shoulders. You can focus on your organization's progress knowing we got your back, technologically and financially.

BLACK  
HAWK +

Our methodology flips the script on cybersecurity. With Blackhawk, you're not just defending from threats, you're ready to engage them.

### BLACKHAWK+™ BRINGS OUR TEAM OF EXPERIENCED INCIDENT RESPONDERS TO YOUR DEFENSE.

The BlackhawkNest incident response team knows how to find adversaries and how to defend against them. We've worked on many of the most highly publicized data breaches over the past 10 years. Most continuous security monitoring services stop at alerting, leaving their customers responsible for completing analysis, investigation and response. We work *with* your team to identify and address unauthorized activities on your network, before those activities become costly, irreversible, and public cybersecurity incidents. At the core of our service is leading-edge threat intelligence. We don't just rely on information from the Threat Intel community. Our skilled hunters are constantly discovering emerging threats and developing new threat signatures, which we feed back to the community and to our customers.

### ABOUT BLACKHAWKNEST INC.

BlackhawkNest is a cybersecurity company with a full range of custom technology built for front-line security. We combine durable storage hardware and powerful security software to eradicate the toughest cyber threats.
